

Attention Lake Simcoe Anglers:

Cisco closely resemble whitefish and are often caught in the same locations. Cisco have a **CLOSED SEASON** on Lake Simcoe and must be released if caught.

Typically cisco are smaller (under 3 lbs) than whitefish but when whitefish are young, it may be difficult to tell the two apart.

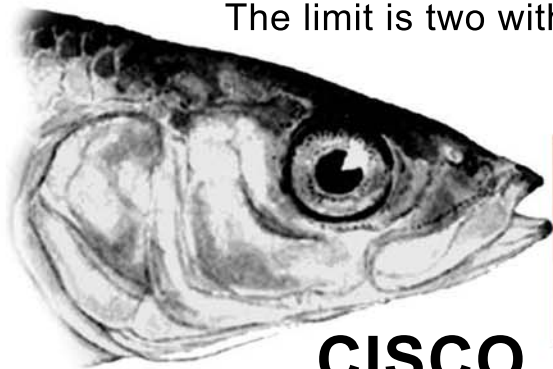

Check the mouth of either fish carefully!
If the mouth is set back from the snout,
you have a whitefish.

WHITEFISH

Lake Simcoe's whitefish season runs from Jan. 1 to March 15th and then again from 2nd Sat. in May until Sept. 30th.
The limit is two with a Sport Licence, one with a Conservation Licence.

CISCO

If the mouth is even with the tip of the snout,
you have a Cisco. **IT MUST BE RELEASED.**
Carefully live release it as quickly as possible!
THANK YOU!

*Anyone who sees or suspects resource abuse should safely take note of as much information as possible and call **1-877-TIPS-MNR (847-7667)**.*
